MOTOR HOME—The new Dodge Motor Home will be on display Friday, Aug. 18, at the main showroom, 505 Pacific Coast Hwy., of Newcastle Dodge in Hermosa Beach. It will be on display from 8:30 a.m. to 9 p.m. daily.

Local Dodge Dealer to Show 'Vacation Wonderland' Fri.

Newcastle Dodge at Hermosa Beach today announced that the Dodge Motor Home will be on display one day only, Friday, Aug. 18, at the main showroom, 505 Pacific Coast Hwy., from 8:30 a.m. to 9 p.m. The motorized home is de-

signed and built by Frank Motor Homes, Inc., Brown City, Mich., on a Dodge P-300 truck chassis. It is powered by a 200-horsepower V-8 engine with a three-speed automatic pushbutton transmission. The display at Newcastle Dodge marks the first such unit to be shown in this area.

Senator Gives Talk to Local Rotary Clubs

Senator Richard Richards speaking before a joint meeting of the Hollywood-Riviera Rotary Club combined with the El Segundo-Manhattan Beach Rotaries at noon August 3, stated that the leadership of the beach cities with state government has led to a significant speed-up of the completion date for the San Diego freeway.

"The Motor Home is ideal for both short and long trips and can tackle practically any terrain," according to Richard Greenwald, dealership owner. "Weekend trips can be extended by leaving on a Friday night instead of Saturday morning. Whenever you get tired, you just stop and call it a day."

The unit is available in three lengths—20, 23 and 26 feet. It has an interior ceiling height of six feet, three inches, and an exterior height of eight feet seven inches. It is 7 1/2 feet wide. All living facilities are provided: two driving compartment swivel seats, a 30-gallon fiberglass water heater tank, a 30-gallon septic tank, a complete shower and lavatory facility, gas refrigerator and stove-oven, a 17,000 BTU thermostatically controlled gas furnace, table, cupboards, beds and tiled floors. The unit sleeps from four persons in the 20-foot home to eight in the 26-foot home.

"Thanks to the work of many people in this room," Richards stated, "we in the State Legislature have been able to obtain a top priority for this major freeway project. Every section of direct concern to the Beach area, we can now announce, will be completed before the spring of 1968, and significant goals will have been reached before the end of this year."

BREAKDOWN

Senator Richards gave a breakdown of construction costs and opening dates as follows for the San Diego Freeway:

Jefferson Boulevard to La Tijera, south, \$4,300,000, 1.8 miles, to be opened April, 1962.

La Tijera to 135th Street, \$11,600,000, 4.7 miles, to be opened February, 1963.

135th Street to Hawthorne Boulevard, \$4,312,000, 2 miles, to be opened February, 1963.

Hawthorne Boulevard to Artesia (174th Street), \$3,313,000, 1.1 miles, to be opened February, 1962.

Artesia to 190th Street, \$7,054,000, 3.4 miles, to be opened July, 1952.

190th Street to Carson Street (which crosses the Harbor Freeway), \$8,120,000, 2.7 miles, to be opened March, 1962.

Carson Street to Alameda, \$4,322,000, 1.9 miles, to be opened June, 1962.

Alameda to Long Beach Freeway, \$5,134,000, 1.1 miles to be opened December, 1961.

Senators Richards pointed to further tangible results of teamwork between his office and beach cities governments, citing the field of education.

MOVING FORWARD
"We are now moving forward in the establishment of a site to be followed soon by actual construction of the South Bay State College. This results from bill which, in response to your requests, I carried in the Senate and which Assemblyman Chapel put through the Assembly. We now have appropriations of two million dollars available for site, acquisition and construction."

Senator Richards offered the further assistance of his office in working toward the furtherance of the interests of the Beach Cities of Los Angeles County, with specific emphasis on the need for further cooperation in the development of the Redondo-King Harbor, the expansion of boating and recreational facilities for the people of this metropolitan area, and the continued effort to solve our transportation and related problems as rapidly as possible.

Other equipment includes 12 and 110-volt lights, kitchen sink, side and roof ventilators, window screens, power steering and brakes, Torsion Aire suspension, heavy duty accessories, and a complete trailer-park hookup system. Gas equipment is operated from two 20-pound LP (low-pressure) gas bottles. The bottles are housed at the rear of the unit in a special ventilated compartment.

"The Dodge Motor Home attempts to combine all the enjoyment and pleasure of camping, modern living and traveling," Greenwald said. "It's a complete home wherever you go."

Accident Odds Threaten Men

Who is most likely to die or be seriously injured in a traffic accident?

Chances are that it will be a man between the ages of 25 and 34, driving a passenger car, traveling straight ahead on a level open road in daylight hours on a clear, dry day.

In commenting on this capsule summary of the most logical accident victim, Director Robert McCarthy of the California Department of Motor Vehicles pointed out that male victims outnumber women almost three to one and most often are in their late twenties or early thirties.

McCarthy also warned that in about forty per cent of all fatal and injury accidents only one vehicle is involved. "We don't have the full explanation," he said, "but it is apparent that speed combined with split second inattention leads to trouble. At sixty miles per hour a car will travel 450 feet in the time it takes to light a cigarette. While eyes are off the road for this brief interval, radical changes can occur in the traffic picture," McCarthy pointed out.

The DMV director emphasized that two of every three fatal accidents occur outside cities, and that August is the year's most dangerous month on open highways.
